## LARGE-FRAME AR

The XO (Executive Order) is gorgeously designed for light weight and functionality. The barrels used are precision instruments, producing groups well into the sub-moa range with quality optics and ammunition. Superior accuracy is further enhanced with the addition of a Geissele Super Dynamic Enhanced (SD-E) two stage trigger; NEMO's recoil reducing bolt carrier—an industry first, and ambidextrous controls. The XO models range from a 16" to 22" barrel lengths, which are ideal for CQB, Hunting, and long-range precision marksmanship. The XO will take your shooting to exceptional levels.
